

# Anti-Vandalism Solution

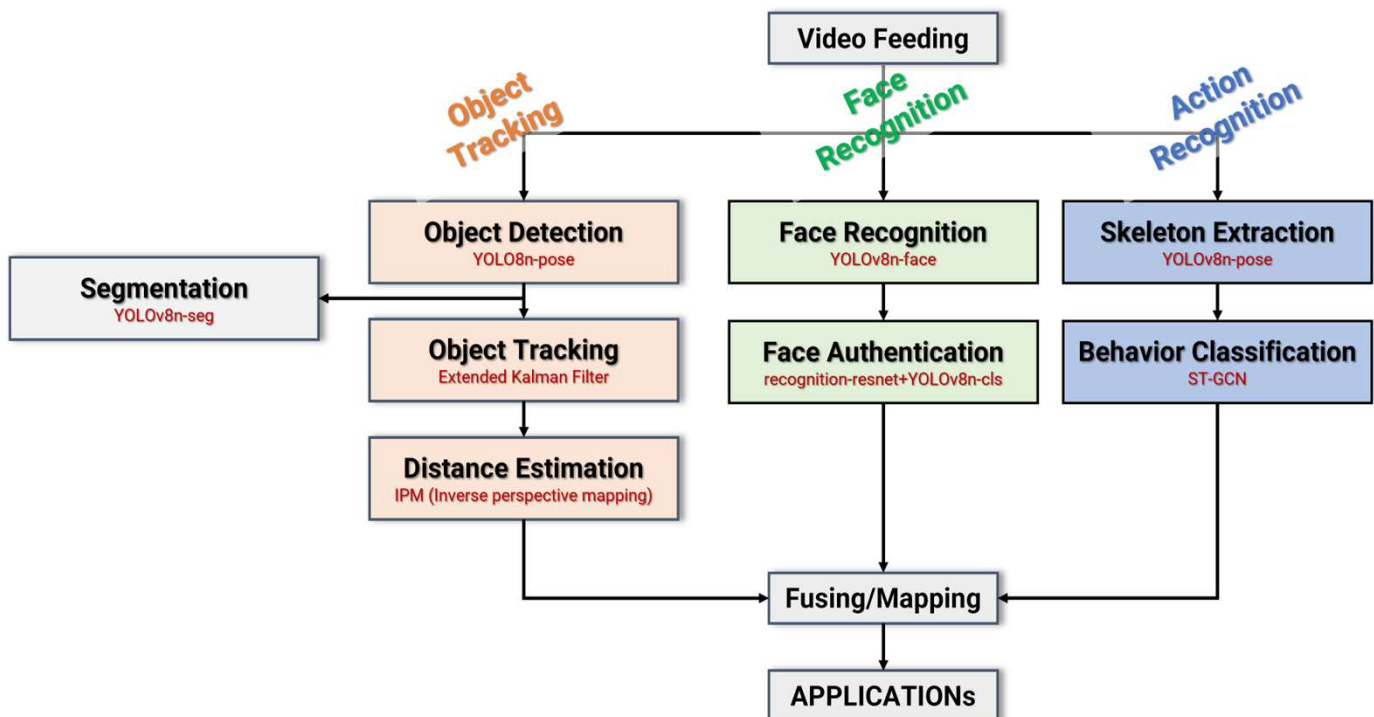

## SAD(Suspicious Action Detection) Algorithm

### [Key Functionalities]

- Camera vision Based SAD for vehicle protection
- 5 kinds of Suspicious Actions
  - Peek/Hand/Stare/Loiter/Approach
- Registrant management based on facial recognition
- Interrupt by Threat Leveling

## Introduction

- **SAD Algorithm** is On-Device AI solution that detects the suspicious actions around vehicles for vehicle protection
- **SAD Algorithm** can be used to transmit the recognition situation to the vehicle owner's mobile phone

## Application

CAR, Block Box, Security
